

Whole Woman Lab | Clinical Report

Deterministic clinical-reasoning output - for practitioner review

Sample Client | Female | age 24

Confirmed: Liver Qi Stagnation, Qi Deficiency, Yin Deficiency, Blood Deficiency. Root: Liver Qi Stagnation, Qi Deficiency. Mixed cold-heat ? heat likely empty/constrained.

Diagnostic Picture

Liver Qi Stagnation (root)

82% (very_high) priority: high

Principle: Course the Liver & move qi; emotional outlet, movement.

Formulas: Xiao Yao San, Chai Hu Shu Gan San, (Ayur) Kumaryasava, Aloe, Hingvastak

Qi Deficiency (root)

58% (moderate) priority: moderate

Principle: Tonify qi; strengthen Spleen & Lung.

Formulas: Si Jun Zi Tang, Bu Zhong Yi Qi Tang, (Ayur) Ashwagandha, Chyawanprash

Yin Deficiency (branch)

74% (high) priority: high

Principle: Nourish Yin & fluids; clear empty-heat; do NOT dry or over-warm.

Formulas: Liu Wei Di Huang Wan, Sha Shen Mai Dong Tang, (Ayur) Shatavari, Amalaki, Guduchi

Caution tag: no_warm_dry

Blood Deficiency (branch)

59% (moderate) priority: moderate

Principle: Nourish blood; build rakta; gentle warm-sweet nourishment.

Formulas: Si Wu Tang, Ba Zhen Tang, Gui Pi Tang, (Ayur) Shatavari, Draksha, Lohasava

Caution tag: no_warm_dry

Treatment Guardrails

[HIGH]

Yin/Blood deficiency present: do NOT use strong warming, pungent-hot, drying or harsh-draining protocols (they consume yin/blood and worsen heat). Favour gentle, nourishing, moistening, cooling-neutral measures.

[MODERATE]

Mixed cold & heat / deficiency masking heat: address root (move stagnation, gently clear heat, nourish) before strong warming.

[ADVISORY]

Cold extremities with qi stagnation may be yang failing to spread, not true yang vacuity: move qi before heavy warming.

Root, Branch & Progression

Roots: TCM_QI_XU, TCM_QI_ZHI

Branches: TCM_SHI_RE, TCM_XUE_XU, TCM_YIN_XU

Heading toward: TCM_TAN_SHI, TCM_XUE_YU, TCM_YANG_XU (reversible)

- TCM_QI_XU -> TCM_YANG_XU: Chronic qi deficiency deepens into yang deficiency (cold).
- TCM_QI_XU -> TCM_XUE_XU: Qi fails to transform food into blood.
- TCM_XUE_XU -> TCM_YIN_XU: Blood (yin) deficiency depletes deeper yin/fluids.
- TCM_QI_ZHI -> TCM_XUE_YU: Long-standing qi stagnation congeals blood into stasis.
- TCM_QI_ZHI -> TCM_SHI_RE: Constrained qi generates stagnation-heat.
- TCM_QI_ZHI -> TCM_TAN_SHI: Liver overacts on Spleen, producing damp/phlegm.

Differential (ranked)

1. Liver Qi Stagnation - present (82%)
2. Yin Deficiency - present (74%)

Whole Woman Lab | Clinical Report

Deterministic clinical-reasoning output - for practitioner review

- 3. Blood Deficiency - present (59%)
- 4. Qi Deficiency - present (58%)
- 5. Damp-Heat / Heat - present (50%)

Deterministic clinical-reasoning output for practitioner review. Not a medical diagnosis; confirm with full examination. Red-flag or acute presentations require biomedical referral.
